Introduction :

The Mathematics Training & Talent Search (MTTS) Programme is one of the most popular and significant training programmes for the undergraduate / postgraduate students in India. It has been running since 1993 and has made an impressive impact on the scenario of Mathematics in India. For participating in this programme, the organizers of this programme receive a large number of applications from students from all parts of the country. However, due to limitation of resources and seats, a large number of deserving students do not get chance to participate in the main camp of the MTTs programme. In order to cater to a larger number of students at regional levels, mini-mtts programme has been initiated which runs on the same line of the main MTTs programme. The aim of this programme is to promote mathematical thinking and expose young minds to the excitement of doing mathematics.

Academic Programme :

The proceeding of the programme will include the following topics :

- ❖ Foundations and Set Theory
- ❖ Real Analysis
- ❖ Linear Algebra

The objective of the programme is to motivate and inspire the students to pursue their career in mathematics and mathematical research and enjoy the excitement of mathematics through discovery of the basic mathematical results by their own.

Who should apply ?

Students studying in the 2nd / 3rd year or 4th semester of B.Sc. / Integrated M.Sc. Programme, having mathematics as one of the compulsory subjects, may apply for the programme.

Preference will be given to the students studying in institutes in and around Krishna District, Andhra Pradesh because of limitation of accommodation for outstation participants.

A small number of students from other parts of Andhra Pradesh and nearby states may be considered subject to the availability of accommodation.

Outstation participants will be paid sleeper class train fare and provided with free food and lodging facilities for their stay during the programme.

How to apply ?
