ABOUT THE SEMINAR

MGNREGS is a flagship programme of Government of India that directly touches the lives of the rural poor and promotes inclusive growth. It is the most pragmatic approach to the problems of rural Poverty and Employment. It ensures the economic security of the rural poor by providing guaranteed wage employment to uplift the backward Socio-Economic conditions of rural people in India. At present, degree of impact, implementation, irregularities and corruption MGNREGS have become a hot issue of debate for researchers, academicians and politics. As the largest social protection programme in the world, it is necessary to evaluate whether MGNREGS provides a vital social safety net for the poor or merely burdens the economy.

RATIONALE FOR STUDY

Since its inception in 2006, around on an average Rs. 1,60,000 crore was invested for various wage employment initiatives under MGNREGA. Considering the size and scope of the programme

implementation, it is necessary for the policy makers and implementers to know the benefits and impacts of such development intervention. Further, issues and challenges limiting the effective implementation of the programme at the grass-root level could be diagnosed through a detailed analysis and corrective measures be outlined, accordingly.
